We couldn't find any data related to your request in the database

heydrew.com

United States Mobile

There are some reasons why this could occur:

- The domain name was mistyped. Please make sure it is spelled correctly.
- The website with this domain name does not exist.
- This is a new website and we don't have it in our databases yet.
- We haven't noticed this domain rank in Google's top 100 organic or paid search results for keywords from our databases.

Initial Suggestions to make your website more organically optimized for search engines:

- ✓ Add a brief and catchy video directly below the NAV BAR that begins as soon as a user enters the website.
- ✓ Add more content to the Home Page to be more specific as to the services you offer with targeted industry keywords (we will need to clarify this better before starting to work on the site)
- ✓ Create an About Us page and provide information about the founder and the company.
- ✓ Add additional pages and blog post articles throughout website to better hit top industry keywords (as well as add at least one relevant pic to each page or post)
- ✓ Utilize text linking throughout the site and implement other on page technical SEO techniques
- ✓ If you have social media profiles, add icons at top or bottom of website template (or both) and link to profiles.
- ✓ Become accredited with the BBB and add your BBB certificate and link to your website template footer (and add any other Accreditations and Certificates if possible)

The following Search Engine Optimization (aka: SEO) analysis has been researched for the website <https://heydrew.com>. Below will be some of the most important tasks we will initiate for improving the site's online presence and increasing organic traffic:

- **Intense Keyword Research** is always the first step in evaluating a website and coming up with a plan for developing it to its true potential. Knowing your most important keywords and phrases will help the web master to know how to structure the website and the most important content to develop for pulling in the most qualified prospects.
- **Site Structure** is another important part of developing or modifying your site to meet requirements for search engine optimization. Each page should be created with SEO style, including the most valuable keywords, key phrases, headers and text links. This is

important for both robots and humans to find what they are looking for quickly. Otherwise, without sufficient quality keywords and site structure, your website will not have the power behind it to combat your competitors. Without the ability to skim the page quickly, many will lose interest more quickly and leave the page.

- **Improve technical issues listed in the above site audit**
- **Improve website content** to include better keywords and improve quality **internal (text) links** within the written content throughout the website to create a breadcrumb-like approach. This will help to increase your Average Session Duration and decrease your Bounce Rate. But most importantly, it will increase qualified prospect traffic and sales.
- **Implement External Links** throughout the website. External Links are text or image hyperlinks that point at another domain (outside of your own website). Industry relevant and sites with high authority values (i.e. government and non-profit, etc.) increase the quality of your own website. When possible, we will initiate what is called a Reciprocal Link. These are any set of hyperlinks between two website that point both ways and are the most difficult to obtain. Developing these types of links happens when both webmasters from two different sites come into an agreement to links back to one another.

HOW WE CAN HELP

Live Media Digital | LMD will provide you with the online marketing support necessary to rank organically on search engines. Search Engine Optimization (SEO) pulls in the most qualified prospects for any type of product or service. Our SEO team's strategy is to begin with making your website a 24/7 lead generator for the most qualified prospects.

Below are some of the ways we will begin helping your location to achieve success utilizing Search Engine Optimization (SEO):

- ✓ Research top keywords to develop a plan of action for making your website's structure and content more optimization friendly.

- ✓ Utilize AI tools to encourage the best optimization
- ✓ Modify some web content, and site structure utilizing technical specifications, keywords and key phrases as needed, to create a breadcrumb approach.
- ✓ Create new pages and articles to add more keywords and key phrases as needed for optimization.
- ✓ Maintain and Manage website continually to keep the website fresh.
- ✓ Assist with the management of your Google Maps listings.
- ✓ We will also always be available to answer any of your SEO questions or concerns.
